iii. BONDS 债券**CANCELLATION OF PURCHASE INSTRUCTIONS**

The Right to Cancel is not available to the following:

- (a) Unlisted debentures with tenures of three months or shorter;
- (b) Unlisted debentures which are exempt from prospectus requirements under the SFA; and
- (c) Purchases of unlisted debentures where the investor is not an individual.

A Cancellation Request must be delivered to your financial adviser within 7 calendar days from the day of purchase. The investor may also send the Cancellation Request by post. The relevant day for determining whether the right to cancel has been exercised within the cancellation period is the date on which such request is posted by the investor, i.e. as determined by the postmark. Where the last day of the cancellation period falls on a Sunday or a public holiday, the cancellation period will be extended to the next calendar day, not being a Sunday or a public holiday.

Where an investor exercises his right to cancel, any sales charge or front-end load fee imposed in respect of purchase of the product shall not be chargeable to the investor.

The cut-off time for receipt of cancellation is the same as the dealing day cut off time at Singapore time 4pm. If the cancellation request is received after the cut-off time, it will be held over until the next dealing day. Where the cancellation request is received via post, the date for determining if the right to cancel has been exercised within the cancellation period is that of the postmark.

The cancellation will be processed as a normal realisation. The relevant price for calculating the refund amount is the realisation price that can be obtained following the cancellation request. As such, you will bear any loss if the realisation price on the cancellation date is lower than the original value at the time of the subscription. Where the market value of the bond(s) is greater than the original amount paid by you, you will not be entitled to receive the excess amount. The initial subscription charge will also be refunded. However, we will be entitled to recover any expense incurred in processing the cancellation, if any.

RISK DISCLOSURE STATEMENTS FOR BONDS

Bonds are debt securities that offer fixed returns over a defined period and are intended to be held to maturity. These instruments carry a number of risks such as credit, default, interest, currency and liquidity risks. Credit risk arises from default events that may result in the inability of the issuer to pay interest or principal. Default risk is high when credit rating is non-investment grade or nonrated.

In a default situation, the buyer may lose both interest and principal. Interest risk arises as bond prices generally move inversely with interest rates. Currency risk arises from holding debt securities that are issued in a foreign currency, hence exposing the buyer to fluctuations in exchange rate. There is a chance that if the currency moves adversely, the buyer may also suffer a loss.

Liquidity risk refers to the availability of prices for buying and selling in a market. It is common for most debt securities to suffer from poor liquidity because they are quoted over-the-counter (OTC).

OTC products are not listed or available on a securities exchange, but traded directly between two parties. Thus, one is exposed to the credit risk of the counterparty in which they enter into a bilateral agreement with. iFAST does not warrant that there is an active trading market and that the price iFAST secures for the customer will at any time be the best price we procure.
